PURPOSE OF THE COURSE

The purpose of the Course is to provide state-of-the-art knowledge and future perspectives on basic and translational research, detection techniques and advanced therapeutic strategies of renal cancer in a multidisciplinary approach. Scientific sessions will include interactive discussions between the faculty and the participants. International experts in research and treatment of renal cancer will share their views and experience with the audience.

This Course is the third of a series of courses held under the aegis of the Italian Society of Urological Oncology.

SCIENTIFIC PRELIMINARY PROGRAMME

Pathology: classification and grading. Present avenues of research. Diagnosis: imaging and markers. Present role on renal biopsy. Prognostic evaluation. Treatment of local lesions. Treatment of metastatic disease. Targeted therapies: present and future. Immunotherapy. The skeletal challenge. Lessons and challenges for the future.
