On the 11th and on the 12th of October, in the culturally rich city of Pisa an important congress will take place: “Urology in 2012: What’s in and What’s new” - Professor Riccardo Minervini will be presiding over the congress. The main topics of the congress will focus on Urologic Oncology and Reconstruction, emphasizing such themes as prostate, kidney, gland and bladder pathologies, with special attention on surgical transsexualism. An important highlight of the congress is minimally invasive robotic surgery, a protected therapy of excellence in health technology which has triggered great interest and has a great potential.

Live Robotic Surgeries from the operating room on radical prostatectomy, surrenalectomy and kidney neoplasia.

The congress will encourage discussion and challenging debate on hot topics related to the latest therapies and surgical techniques in superficial neoplasia and bladder infiltrating.

UROLOGY IN 2012

**WHAT'S IN
AND WHAT'S**

PISA • OCTOBER 11-12, 2012

CONSIGLIO NAZIONALE DELLE RICERCHE

A debate between the main surgical centers of excellence for transsexualism will be useful to evaluate the latest techniques in reconstructive andro-gynoid and gino-android.

The excellence of the scientific program is thanks to the participation of some of the most well-reputed doctors in the field, both nationally and internationally.

This conference will be a wonderful opportunity for meeting new colleagues and seeing familiar faces who have come together to debate, to exchange and engage, in a friendly atmosphere while sharing scientific and cultural experiences.
